Evaluating/Assessing Websites

Who [authority/expertise]
- Who authored the site? You may have to dig around for this...
- Are they experts in the field/in the subject addressed on the site? How do you know?
- What are their credentials? Who are they affiliated with?
- Is there a site sponsor? Who is it? Is it a corporate group?
- Does their domain name (com/commercial; org/organizational; edu/educational; gov/governmental; net/network) tell you something about them?

What [bias/objectivity]
- What point of view is expressed? Is this information more opinion based or more fact based?
- Do you see any biases? Are the viewpoints of others present, especially ones that contradict that/those of the author(s)?

When [currency]
- Is the publication date on the site? A copyright notice? How current is it?
- Does the site indicate when it was last updated? Note: Different webpages within the site may have different dates....

Where [structure/meaning/appropriate evidence]
- Does this information fit in with other information you have gathered? Where does it fit? Does it support or contract that earlier information?
- Are links or references to related information provided? Are these links functional and do they lead to current or updated information?
- Does the site give you other information about where to go next?
Why [intentionality/authority]

- Why are they presenting this information publicly? Do they make their intentions clear?
- Why would you use this information? Does their opinion have standing in the community?

How

- Can you easily verify the accuracy of this information?
- How can you use this information for your needs? Where in your paper/project?
- How can you contact others for further information?
